

MICROFLUIDICS APPOINTS NORTHERN CALIFORNIA SALES REPRESENTATIVE

Newton, Mass. - Microfluidics announces the appointment of Rebecca Stoklosa as factory direct Sales Representative for the Northern California market. In her position, Stoklosa will be responsible for all sales activity and customer relations in the region.

“I am delighted to welcome Rebecca to the sales team at Microfluidics,” said Thomas Hoarty, Vice President of Sales & Marketing at Microfluidics. “She will no doubt be an important asset in the fast growing Northern California market. Rebecca’s appointment reflects both our commitment to new growth and dedication to service our current customer base.”

Prior to this position, Stoklosa held an analyst position at Shaw Industries, where she was responsible for interpreting data and developing and implementing new programs and organizational systems. She has a Bachelor’s Degree from Georgia Institute of Technology where she graduated first in the School of Polymer and Fiber Engineering.

About Microfluidics

Microfluidics provides patented and proprietary high performance Microfluidizer® materials processing equipment to the biotechnology, pharmaceutical, chemical, cosmetics/personal care and food industries. Microfluidics applies its nearly 20 years of high pressure processing experience to produce the most uniform and smallest liquid and suspended solid structures available, and has provided manufacturing systems for nanoparticle products for more than 15 years.

The Company is a leader in advanced materials processing equipment for laboratory, pilot scale and manufacturing applications, offering innovative technology and comprehensive solutions for nanoparticles and other materials processing and production.
